Finance Committee Report Q4 2023

ECONOMIC SUMMARY

Interest rates

Interest rates started to decline in the fourth quarter for the first time since 2020. The 2-year treasury yield declined 80 basis points (bps), starting the quarter at 5.05% and falling to 4.25%. The 10-year treasury yield declined 69 bps, starting the quarter at 4.57% increasing all the way to 4.99% before falling to 3.88% by quarter-end. The Fed's last hike was in July and has been on hold the last three meetings. The markets believe the Fed is done hiking and will start cutting rates as soon as March of 2024. Six (25 bps) cuts were priced into the market at year-end. However, based on the Fed's new Summary of Economic Projections (SEP) from its December meeting, the Fed expects just three (25 bps) cuts in 2024.

Inflation

Core inflation continued to moderate throughout the quarter which is why so many interest cuts have been priced into the market. This is where markets and the Fed diverge. The Fed believes inflation is falling *not* because restrictive monetary policy has slowed demand, but rather because supply chains have continued to heal, and the labor force has continued to grow primarily thanks to increased immigration. The concern with inflation falling for these reasons is that once normalized, the supply chain improvements will no longer be disinflationary. Powell agrees that immigration and labor force growth might continue to push inflation lower for a time but after that, without demand cooling, the Fed cannot risk easing too much until it is certain inflation will continue to fall which will take time to gauge. The Fed wants to proceed with caution, the market is all in.

Stable job market

Jobs added per month continued to slow in the fourth quarter. Non-farm payrolls increased on average 367k per month in 2022 and 225k per month in 2023. Slowing job growth is not affecting the unemployment rate which averaged 3.6% in both 2022 and 2023. Labor participation continues to tick up but very slowly. 2022's average Labor Participation Rate was 62.2% while 2023's average was 62.6%.

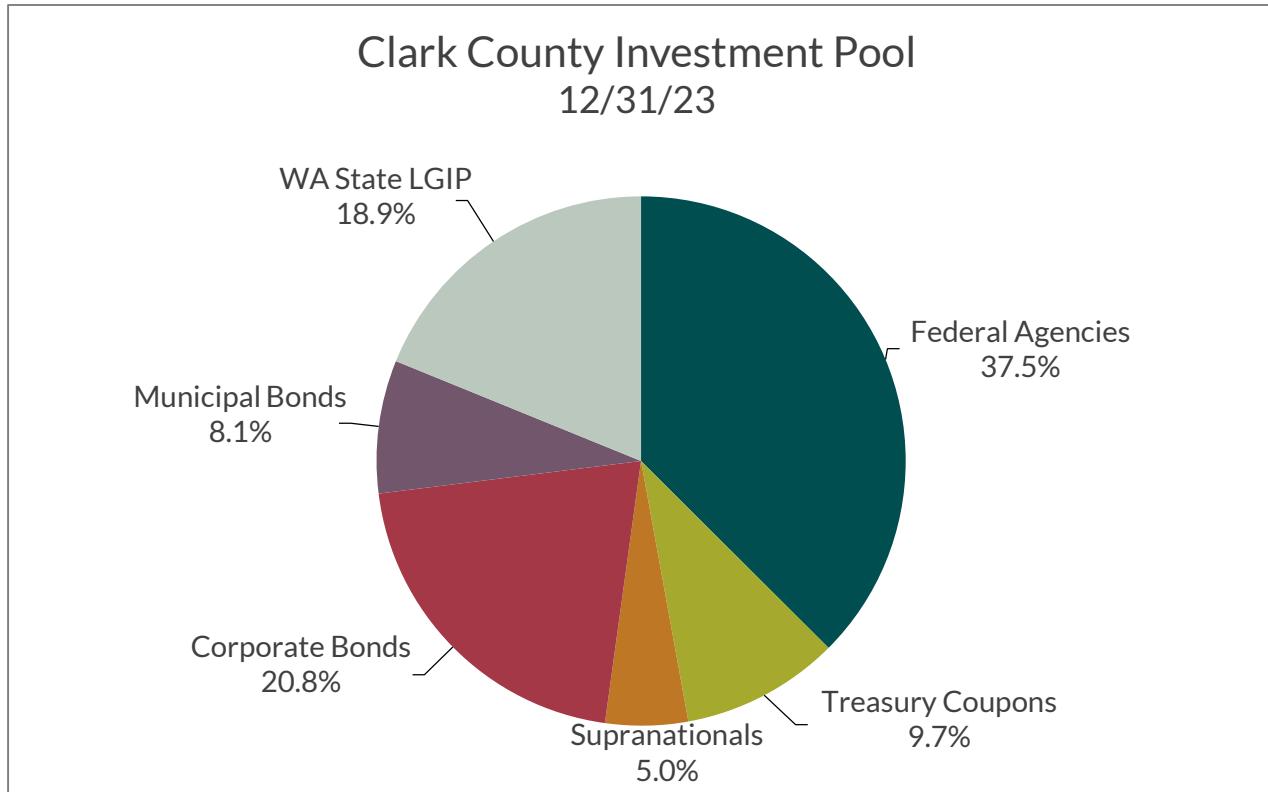

"Soft Landing" gains momentum

Many called for a recession this time last year, but consumer demand has yet to cool. Fourth quarter GDP growth came in at 3.3%, blowing past market expectations of 2.0% growth and even the Fed's expectation of 2.4% growth. The consumer remained strong with personal consumption increasing 2.8% but the quarter beat expectations mainly due to unexpected export growth. Exports rose 6.3% while imports rose only 1.9%. Residential investment was also positive for the second quarter in a row after nine consecutive negative quarters.
