

CLARK COUNTY

RFP #885

MST LAB SERVICES

QUESTIONS and ANSWERS

UPDATED: FEBRUARY 13, 2024

| | QUESTION | ANSWER |
|----|---|---|
| 1. | Do you know the number of samples that will be collected and submitted and the number of DNA markers that will require MST analysis for this project? | We expect to collect around 30 samples in the first year of the contract. We would expect to require 2-5 DNA markers per sample from the biomarker list in the RFP. |
| 2. | Also, will the testing require qualitative or quantitative testing? | We would like qualitative and quantitative testing in copies per 100ml. |
| 3. | Are Preservations Kits an acceptable substitute for coolers and ice packs. | Yes, Preservation Kits can be provided as an alternative to using coolers and ice packs. |
