

CLARK COUNTY

RFP #893

LACAMAS REGIONAL PARK ACCESS ROAD BRIDGE REPLACEMENT

QUESTIONS and ANSWERS

UPDATED: MAY 29, 2024

	QUESTION	ANSWER
1.	Regarding the subject RFP, will the County consider adjustments to the sample contract language that was included with the RFP?	After the closure date of the RFP passes, if a firm is identified as a top proposer, and the County enters contract negotiations with the firm, the County's Legal and Risk Management departments will review and respond to any requested contract term and condition changes prior to contract execution.
2.	It looks like the County would just like to see relevant project experience in the "Project Approach and Understanding" section, as opposed to a write-up on our anticipated technical approach. Are we understanding that correctly?	The County will select the engineering firm with the best qualifications, so a presentation of anticipated services for this project is not required.
3.
