

DEAB and PAB Recommendations

Joint

Listed below are recommendations that both DEAB and PAB agree to:

Look into developing smaller more innovative parks - The function, not just size, should be considered when measuring the goals of the parks plan

Private “pocket parks” in developments that are open to the public should be counted towards the total park inventory

Allow developers to apply for credits based on an agreed upon standards created by PAB and DEAB.

Explore a 2 tier credit system

Collaborate more in park development/ land purchases

Provide PIF credits for trails

DEAB

Listed below are recommendations that DEAB would like to see implemented:

Joint use areas like those associated with schools should count towards meeting the park plan goals

Open space/Greenway facilities, trail complexes, and special facilities/sports fields should count towards acreage goals due to recreational opportunities

By implementing the recommendations listed above, PIF's may be able to be reduced which will help with affordable housing issues

PAB

Listed below are recommendations that PAB would like to see implemented:

Increases goals for level of service. Current County goal is 60% of National Standard and Clark County is not even meeting that expectation
