

PROPOSED CHARTER AMENDMENT NO. 9

Concerning Methodology for Adjusting Vancouver Councilmember Salary

The City Council of Vancouver adopted Resolution M-4279 concerning how and when salary increases are calculated for City Councilmembers. If approved, this amendment would clarify language relating to the use of an external economic indicator (the Consumer Price Index) to calculate adjustments to City Councilmember salaries and would adjust by two months, the date by which a biennial salary schedule must be adopted by the City's Salary Review Commission.

Should this amendment be approved?
